

LAND ROVER  
**DISCOVERY  
SPORT**

**HOW IT WORKS**

The system uses three, forward-facing cameras in each door mirror and on the front grille to create a virtual, 180-degree view of the road ahead.

**CLEAR SIGHT  
GROUND VIEW**

The New Discovery Sport uses pioneering technology that allows you to see, hear and feel more than ever before from behind the driver's seat. ClearSight Ground View technology effectively makes the bonnet invisible, ideal when you're exploring the great outdoors.

 CONVENTIONAL  
FIELD OF VISION

 CLEAR SIGHT

**GROUND VIEW  
IN NUMBERS**

ABOVE & BEYOND

**8.53 x 15 m**  
MINIMUM FIELD OF VISION

**30 km/h**  
MAXIMUM OPERATIONAL SPEED

**FROM THE DRIVER'S SEAT**

The feed is displayed on to the touchscreen giving a much clearer picture of the contours of the terrain and the vehicle's wheel position – resulting in a more accurate representation of the environment and driver manoeuvres.
