

JAGUAR I-PACE

YOUR ELECTRIC LIFE

TOP 12 FACTS

1 LONGEST RANGE

A range of up to 292 miles (WLTP) means I-PACE can go further than the Audi e-tron or Mercedes EQC

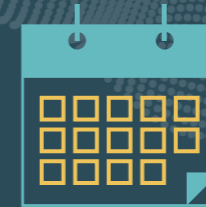

2 PUBLIC CHARGING

Most charging is done at home, but when going on a long trip the use of apps and charging providers is needed. There are more than 23,000 public chargers across the UK - a quick check of available charging solutions is recommended before making longer journeys

3 ALWAYS CHARGED

With the average commute you'd only need to charge once a week, but with a home wall box you can choose to keep I-PACE fully charged, topping up every night, just like a smart phone. As it's at home this means no more trips to the fuel station

4 HOME CHARGING

We can recommend an approved and tested wallbox supplier to easily set-up your home charging - and the Electric Vehicle Homecharge Scheme grant means you get up to £500 off the price to purchase and install

5 WATER TIGHT

It's safe to charge your electric car in the rain or take it to a car wash. Did you know I-PACE has a wading depth of 500mm?

6 PRE-CONDITIONING

Pre-condition the battery and cabin to the ideal temperature while I-PACE is plugged-in to make sure it's ready for your journey and has maximum range

7 AWARD-WINNING

It's as good to look at as it is to drive, which is why I-PACE was voted the best car in the world

8 SAFETY FIRST

I-PACE is designed to keep you and your family safe, and that's why it was awarded the maximum five-star EuroNCAP rating

9 SPACIOUS

I-PACE's design and battery position enables a spacious cabin and large boot. There's easily enough room for five people and everything you'll need to take with you

10 BATTERY WARRANTY

The I-PACE is built to last and that's why the battery has an 8-year, 100,000-mile warranty

11 ZERO EMISSIONS

As a zero-emissions vehicle, I-PACE qualifies for a £3,500 UK government grant - and you won't pay a penny to drive into London

12 ASSISTANCE 24/7

Questions? I-Assistance means no worries wherever you are - at the touch of a button inside the car you'll be connected directly to an expert to answer any queries you may have, any time of day
