

LAND ROVER DISCOVERY SPORT: ENHANCED FOR EVERY FAMILY ADVENTURE

Beautiful proportions, unique character, purposeful stance

- **Discovery Sport:** The world's most versatile and capable compact 5+2 SUV features enhanced design, the latest user-friendly technology and more efficient, electrified engines
- **Urban Edition:** Captivating Discovery Sport Urban Edition features distinctive design enhancements
- **Quality interior:** Premium cabin with superior levels of craftsmanship, heightened comfort and the latest 'Pivi' infotainment
- **Versatile by design:** Practical 5+2 seating layout improved with 40:20:40 split-folding second row seats – providing 24 configurations and more flexibility for family adventures

CAPTIVATING URBAN EDITION

The Discovery Sport Urban Edition is based on the R-Dynamic. This special edition features distinctive design elements including Shadow aluminium finishers, non-leather Luxtec Suedecloth seats and a black contrast roof. The Urban Edition is available in five colourways: Carpathian Grey, Firenze Red, Santorini Black, Ostuni Pearl White and Hakuba Silver.¹

The Urban Edition features a suite of Land Rover technology, including a powered tailgate and the ClearSight Interior Rear View Mirror which switches seamlessly between a video feed and mirror, allowing the driver to see what's behind the vehicle easily – even if the view is obscured by passengers or luggage.

INTELLIGENT DESIGN

Versatile by design, the Discovery Sport adapts to every family adventure to keep you safe and comfortable throughout – whether on the school run, a journey round town or a trip to the Alps.

Discovery Sport is the kind of vehicle you cannot help but notice. Beautifully proportioned, it combines a unique character and purposeful stance to create something unmistakable, but remains every bit as capable as a Land Rover should be. No matter where you are, Discovery Sport's innovative technology keeps you and your passengers connected, informed and entertained.

Professor Gerry McGovern OBE, Chief Creative Officer, Jaguar Land Rover, said: *“Building on the success of the original Discovery Sport, this beautifully proportioned vehicle has been refined, enhancing its characterful exterior which complements the engaging nature of the interior space.”*

DESIGN

Modernity and refinement are reflected in the front and rear bumpers, grille design and LED lights, making the Discovery Sport a compelling, sophisticated and sporty addition to the Discovery family.

Customers can choose from 11 premium exterior paint colours and the option of a black contrast roof. All models feature Silver Atlas detailing on the grille and tailgate finisher, while purposeful R-Dynamic vehicles feature a Black Pack, R-Dynamic badging on the front grille and branded metal treadplates inside.

The moment you sit inside the Discovery Sport you feel a sense of calm, as the panoramic roof bathes the cabin in light and accentuates all the uncluttered surfaces. Premium materials have been responsibly sourced throughout, ensuring occupants always enjoy the drive – whether on the open road or in the city – while a reduction in road and engine noise ensure families can talk comfortably and stay connected with each other on a long journey.

With versatility at its core, the interior has been designed to meet the challenges of an active lifestyle, combining a 5+2 seat layout with a spacious, modern interior that features two digital display screens and an upgraded centre console. This is punctuated by soft rotary controls and buttons, set into a hidden-until-lit gloss black interface and grouped logically.

A clean and elegant three-spoke, multi-function steering wheel with capacitive switches, a modern and easy-to-read instrument cluster and the recently updated Pivi Pro Infotainment system, all contribute to a modern and well-considered interior design.

Every seat in this vehicle has been given equal focus, with a design that gives improved comfort. Customers can also choose sustainable, non-leather Luxtec material made of a recycled polyester microfibre. Luxuriously soft, lightweight, durable and tear-resistant, it comes with the option of a softer, more tactile Alcantara steering wheel.

Owners can personalise their vehicle with Land Rover's Black Pack, available as standard on R-Dynamic models and optional on core models. It features additional Narvik Black detailing on the grille and fender vents, which extends to the bonnet and tailgate lettering.

Land Rover offers a suite of 12 wheel choices across five sizes – ranging from 17 to 21 inches – that allow customers to personalise their vehicles even further.

VERSATILE INTERIOR

Modern family life requires versatility and practicality and the new Discovery Sport has been designed and engineered to be even easier and more family-friendly.

DESIGN

Land Rover's most advanced infotainment system, Pivi Pro, is standard on Discovery Sport. An intuitive menu structure takes users to the most popular features and functions from a single home screen in two taps or less, and a new electrical architecture makes the touch screen fast and responsive. Online entertainment services include Spotify integrated as a 'media source' within the infotainment menu, with data included², and Bluetooth connectivity for two phones at once, in addition to wireless charging with signal-boosting option.

Additionally, a dual-modem embedded SIM allows scheduled vehicle software updates 'over-the-air' – so customers don't need to visit a retailer to ensure they always have the most up-to-date apps, maps, services and vehicle software.

Discovery Sport is based on Land Rover's mixed-metal Premium Transverse Architecture. Its 2,741mm wheelbase and compact suspension design combine to offer an enhanced 5+2 seat layout, greater ride comfort and increased stowage to create the ultimate compact SUV for modern families.

Discovery Sport's three-row layout delivers a more flexible seat design, while the architecture delivers a 40:20:40 second row split for greater flexibility on any journey. Offering greater comfort and versatility than before, row two slide, fold and recline is available as an option on S and SE models and available as standard on R-Dynamic HSE.

With the ability to slide the second row forwards and back, legroom can be as much as 968mm in the second row and 655mm for third-row passengers³. The stepped roof – a hallmark of Discovery family design – and flat floor also ensure headroom of 984mm in the second row and 875mm for third-row passengers. The Third Row Seat Pack is also available and provides customers with everything they need to keep seven passengers comfortable and entertained. The pack includes the third row seats themselves, the tilt and slide row 2, the row 3 vents, and USBs for both row 2 and 3 occupants.

Boot space is 89 litres, increasing to 1,794 litres when the second-row seats are folded flat, while the standard cargo net stops loose items from sliding around.

The central storage bin offers a generous 7.3-litre capacity and features an optional removable tray with two cup holders. The tray includes a smartphone holder that, alongside a similar space in the base of the storage area, allows devices to be charged by one of the two USB charging sockets inside.

Cup holders and re-positioned storage spaces for third-row passengers mean there is a place for everything, while USB and 12-volt charge points (in total, seven and two, respectively) are located conveniently throughout the cabin. Front-row occupants can also benefit from wireless charging for compatible smart phones and tablets.

DESIGN

Optional Click & Go and Click & Play tablet holders are also available for second-row passengers. The removable features hold smart devices and can easily be positioned at multiple angles for in-cabin comfort and rear entertainment. The tablet holders also enable passengers to charge their smart devices whilst they are working, watching movies or playing games – perfect for keeping children entertained on long journeys.

Paul Cleaver, Chief Programme Engineer, Discovery Sport, said: *“Design is about more than how something looks. Good design is intuitive and user-friendly and makes your life better. That’s exactly what sets Discovery Sport apart. We have made Discovery Sport the perfect family SUV, not only by optimising the interior space, but by making it smarter with new technologies.”*

Helping to make everyday life a bit easier, the Discovery Sport fuel tank has a capacity of 65 litres, in addition to the 17 litre UREA (AdBlue/Diesel Exhaust Fluid) tank’s capacity. The maximum towing weight of 2,500kg and the availability of optional Advanced Tow Assist – the company’s pioneering technology for more intuitive and safe reversing – makes life even easier once you have reached your destination.

The Land Rover Discovery Sport’s versatile interior features two-zone climate control as standard, allowing the driver and front passenger to individually find a suitable temperature. This extends to second and third-row occupants, who can now set the temperature using their own controls, while optional cabin air ionisation helps purify the air with electrically charged particles and reflects a greater focus on occupant wellness.

Alongside a key fob design, owners can add a powered tailgate and Jaguar Land Rover’s second-generation Activity Key – all intended to streamline the customer experience. These are available with a series of accessory packs that offer additional functionality across vehicle practicality, connectivity, driver assistance and parking. There are also Land Rover Pet Pack accessories, designed to improve the Discovery Sport experience for customer and dog alike.

ENDS

Please note: *There is currently a global shortage of semi-conductor components. As a leading manufacturer utilising cutting edge technology, Land Rover is currently being affected by the shortage and as a result some features described will only be available in certain markets. We are working closely with affected suppliers to resolve the issues and minimise the impact on customer orders wherever possible.*
